

PMC CANADA LTD.

Fabricated Elbow Covers

All PMC Fabricated Elbow Covers are made to fit the actual outside diameter, bend degree, bend radius and/or number of miters per fitting ordered. Fabricated from any jacketing material, in any thickness or gauge - equal or reducing dimensions or number of linear and or circumferential sections required. All PMC elbow covers are available in either Gore Sets or Lobster Cans™, in positive or negative throat.

Lobster Cans™ are 2-piece fitting covers, riveted together with self-piercing rivets. The interior of the rivet is swaged smooth and will not cut any vapour barriers.

Lobster Cans™ can be produced to any number of pieces per fitting cover desired.

Products are ASTM C 450 Compliant.

Products may also be compliant with one or more of the following;

ASTM B 209

ASTM C 585

ASTM C 1371

ASTM C 1729

ASTM E 84
